

CS 3305A Assignment 4 FAQ:

FAQ 1: Can we change the input file name and format?

Answer: No. The input file must be "rr_input.txt" with file type ".txt"

FAQ 2: Will the test input file always be sorted based on arrival time like the ones we have in the sample input file?

Ans: Yes, the input will be sorted based on arrival time.

FAQ 3: Can we use hard-coded file name in the code?

Answer: Yes. For this assignment, you do not need to take any input from the user. The input file name must be hard-coded in the source file as you are not allowed to take the input file name as an input in the program.

FAQ 4: Can we define our helper function except main?

Answer: Yes, you can. For example, you can define a function for processing input. The program structure is up to you.

FAQ 4: Do we have to create threads to implement this simulated RR scheduling?

Answer: No, using threads is not a requirement for this assignment.
